NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of American Equity Investment Life Insurance Company of New York ("the Company") are presented on the basis of accounting practices prescribed or permitted by the New York State Insurance Department (the "Insurance Department").

The Insurance Department recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the Insurance Department. There are no differences between accounting practices prescribed or permitted by the Insurance Department and NAIC SAP that materially impact the Company.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Insurance Department is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make certain estimates that affect the reported assets and liabilities, including reporting or disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Future events, including changes in interest rates and asset valuations, could cause actual results to differ in the near term from the estimates used in the financial statements.

The most significant estimates include those used in determining policy reserves, impairment losses on investments and federal income taxes. Although some variability is inherent in these estimates, the recorded amounts reflect management's best estimates based on facts and circumstances as of the date of the financial statements. Management believes the amounts provided are appropriate.

C. Accounting Policy

- The Company considers all highly liquid debt instruments purchased with a maturity of twelve months or less to be short-term investments and are stated at amortized cost.
- Realized capital gains and losses are recorded on the trade date and determined on the basis of specific identification and are recorded net of related federal income taxes and amounts transferred to the Interest Maintenance Reserve ("IMR"). Under a formula prescribed by the NAIC, the Company defers, in the IMR, the portion of realized gains and losses on sales of fixed income investments, principally bonds, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity of the security. The Asset Valuation Reserve ("AVR") is established by the Company to provide for anticipated losses in the event of default by issuers of certain invested assets. The AVR is determined using a formula that is intended to establish a reserve to offset potential credit-related investment losses.
- The carrying values of all investments are reviewed on an ongoing basis for credit deterioration. An other-than-temporary impairment shall be considered to have occurred if it is probable that the reporting entity will be unable to collect all amounts due according to the contractual terms of a debt security in effect at the date of acquisition. If this review indicates a decline in fair value that is other than temporary, the carrying amount of the investment, other than loan-backed and structured securities, is reduced to its fair value and a specific other than temporary impairment is taken. A decline in fair value which is other than temporary includes situations where the Company has made a decision to sell a security prior to its maturity at an amount below its carrying value. Such reductions in carrying values are recognized as realized losses on investments.
- Common stocks are stated at fair value based on the latest quoted market prices.
- The Company has no investments in preferred stock.
- The Company has no investments in mortgage loans.
- If the fair value of a loan-backed or structured security is less than its amortized cost at the reporting date, the Company assesses whether the impairment is other than temporary. If the Company intends to sell the loan-backed or structured security, an other than temporary impairment is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.
- If the Company does not intend to sell the loan-backed or structured security, the Company assesses whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost, an other than temporary impairment is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.
- If the Company does not expect to recover the amortized cost basis of the security, it is unable to assert that it will recover its amortized cost even if it does not intend to sell the security and the entity has the intent and ability to hold such security. Therefore, in those situations, an other than temporary impairment is considered to have occurred and a loss is recognized in an amount equal to the excess of amortized cost over the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate.
- Interest income is recognized on an accrual basis. Dividend income is recognized when declared. The Company does not accrue income on bonds in default which are delinquent more than twelve months. Further, income is not accrued when collection is uncertain.
- The Company has no investments in subsidiaries, controlled or affiliated companies.
- The Company has no ownership interests in joint ventures, partnerships, and limited liability companies.

NOTES TO FINANCIAL STATEMENTS

- 9. The Company has no investments in derivatives.
- 10. The premium deficiency calculation does not apply to the Company.

NOTE 20 Fair Value Measurements

A.

(1) Fair Value Measurements at Reporting Date

Description for each class of asset or liability	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Total
a. Assets at fair value					
Common Stock	\$ -	\$ 46,427	\$ -	\$ -	\$ 46,427

There were no financial liabilities measured at fair value at the reporting date of December 31, 2021.

(2) Fair Value Measurements in (Level 3) of the Fair Value hierarchy

None.

(3) Policy on Transfers Into and Out of Level 3

Transfers of securities among the levels occur at times and depend on the type of inputs used to determine fair value of each security. There were no transfers between levels during any period presented.

NOTES TO FINANCIAL STATEMENTS

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Fair value is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The objective of a fair value measurement is to determine that price for each financial instrument at each measurement date. The Company meets this objective using various methods of valuation that include market, income, and cost approaches.

The Company categorizes its financial instruments into three levels of fair value hierarchy based on the priority of inputs used in determining fair value. The hierarchy defines the highest priority inputs (Level 1) as quoted prices in active markets for identical assets or liabilities. The lowest priority inputs (Level 3) are the Company's assumptions about what a market participant would use in determining fair value such as estimated future cash flows. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. The Company categorizes its financial assets and liabilities recorded at fair value in the consolidated balance sheets as follows:

Level 1 - Quoted prices are available in active markets for identical financial instruments as of the reporting date. The Company does not adjust the quoted price for these financial instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

Level 2 - Quoted prices in active markets for similar financial instruments, quoted prices for identical or similar financial instruments in markets that are not active, and models and other valuation methodologies using inputs other than quoted prices that are observable.

Level 3 - Models and other valuation methodologies using significant inputs that are unobservable for financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. Financial instruments that are included in Level 3 are securities for which no market activity or data exists and for which the Company used discounted expected future cash flows with its own assumptions about what a market participant would use in determining fair value.

(5) Derivative Fair Values

None.

B. Other Fair Value Disclosures

None.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The following table represents the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries and joint ventures). The fair values are also categorized into the three level fair value hierarchy.

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Net Asset Value (NAV)	Not Practicable (Carrying Value)
Assets							
Bonds	\$ 176,181,325	\$ 159,245,584	\$ 500,500	\$ 175,680,825	\$ -	\$ -	\$ -
Other invested assets	\$ 3,816,624	\$ 3,136,244	\$ -	\$ 3,816,624	\$ -	\$ -	\$ -
Common stock - unaffiliated	\$ 46,427	\$ 46,427	\$ -	\$ 46,427	\$ -	\$ -	\$ -
Cash and cash equivalents	\$ 6,163,870	\$ 6,163,870	\$ 6,163,870	\$ -	\$ -	\$ -	\$ -
Liabilities							
Policy benefit reserves	\$ 110,346,722	\$ 110,951,261	\$ -	\$ -	\$ 110,346,722	\$ -	\$ -

Bonds: The fair values of bonds are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.

Preferred and common stock: The fair values of preferred and unaffiliated common stocks are based on quoted market prices.

Other invested assets: The fair values of other invested assets are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.

Cash and cash equivalents: Amounts reported in the statutory- basis balance sheets for these instruments are reported at their historical cost which approximates fair value due to the nature of the assets assigned to this category.

Policy benefit reserves: The fair values of the liabilities under contracts are stated at the cost the Company would incur to extinguish the liability (i.e., the cash surrender value). For period-certain annuity benefit contracts, the fair value is determined by discounting the benefits at the interest rates currently in effect for newly issued immediate annuity contracts.

D. Not Practicable to Estimate Fair Value

None.

E. Estimates using NAV practical expedient

As of December 31, 2021, the Company did not have any investments measured using the NAV practical expedient.

NOTE 31 Reserves for Life Contracts and Annuity Contracts

- (1) The Company waives deduction of fractional premiums upon the death of the insured. Surrender values are not promised in excess of legally computed reserves.
- (2) As part of the underwriting process, an individual may be determined to be substandard. In some cases, additional premiums are charged depending on such determination.

The reserves for annuity policies, developed by actuarial methods, are established and maintained on the basis of published mortality and morbidity tables using assumed interest rates and valuation methods that will provide, in the aggregate, reserves that are not less than the minimum valuation required by law or guaranteed policy cash values.
- (3) As of December 31, 2021, the Company has no insurance in force for which the gross premiums are less than the net premiums according to the standard valuation set by the State of New York.
- (4) The Tabular Interest, Tabular Less Actual Reserves Released and Tabular Cost have been determined by formula as described in the instructions.
- (5) For the determination of Tabular Interest on fund not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as one hundredth of the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.
- (6) None.
