NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the Iowa Department of Commerce, Insurance Division (the "Insurance Division").

The Insurance Division recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Iowa Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the Insurance Division. The Company differs from NAIC SAP under Iowa Administrative Code 191 - Chapter 97, Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve ("IAC 191-97"), a prescribed practice issued by the Insurance Division. Under this prescribed practice, call option derivative instruments that hedge the growth in interest credited on index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income and indexed annuity reserves are calculated based on Standard Valuation Law and Guideline 35 assuming the market value of the call options associated with the current index term is zero regardless of the observable market value for such options.

The Company also has a prescribed practice under Iowa Administrative Code 191 - Chapter 43 "Annuity Mortality Tables For Use In Determining Reserve Liabilities for Annuities" ("IAC 191-43") which allows the use of the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. The Company began using the 2012 IAR Mortality Table for annuities issued on or after January 1, 2016. NAIC SAP requires the use of the 2012 IAR Mortality Table for determining the minimum standard of valuation for annuities issued on or after January 1, 2015.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Insurance Division is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with NAIC SAP requires management to make certain estimates that affect the reported assets and liabilities, including reporting or disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Future events, including changes in interest rates and asset valuations, could cause actual results to differ in the near term from the estimates used in the financial statements.

The most significant estimates include those used in determining policy reserves, impairment losses on investments and federal income taxes. Although some variability is inherent in these estimates, the recorded amounts reflect management's best estimates based on facts and circumstances as of the date of the financial statements. Management believes the amounts provided are appropriate.

C. Accounting Policy

1. The Company considers all highly liquid debt instruments purchased with a maturity of twelve months or less to be short-term investments and are stated at amortized cost.

NAIC 6 ratings are reported at the lower of amortized cost or fair value. Amortization is computed using methods which result in a level yield over the life of the security. The Company reviews its prepayment assumptions on mortgage and other asset-backed securities at regular intervals and adjusts amortization rates retrospectively when such assumptions are changed due to experience and/or expected future patterns.

Realized capital gains and losses are recorded on the trade date and determined on the basis of specific identification and are recorded net of related federal income taxes and amounts transferred to the Interest Maintenance Reserve ("IMR"). Under a formula prescribed by the NAIC, the Company defers, in the IMR, the portion of realized gains and losses on sales of fixed income investments, principally bonds, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity of the security. Pursuant to NAIC guidance INT 23-01 Net Negative (Disallowed) Interest Maintenance Reserve, net negative (disallowed) IMR may be reported as an admitted asset by the reporting entity, subject to a limitation of 10% of the reporting entity's adjusted general account capital and surplus. The Asset Valuation Reserve ("AVR") is established by the Company to provide for anticipated losses in the event of default by issuers of certain invested assets. The AVR is determined using a formula that is intended to establish a reserve to offset potential credit-related investment losses.

The carrying values of all investments are reviewed on an ongoing basis for credit deterioration. An other than temporary impairment shall be considered to have occurred if it is probable that the reporting entity will be unable to collect all amounts due according to the contractual terms of a debt security in effect at the date of acquisition. If this review indicates a decline in fair value that is other than temporary, the carrying amount of the investment, other than loan-backed and structured securities, is reduced to its fair value and a specific other than temporary impairment is taken. A decline in fair value which is other than temporary includes situations where the Company has made a decision to sell a security prior to its maturity at an amount below its carrying value. Such reductions in carrying values are recognized as realized losses on investments.

3. Common stocks are stated at fair value based on the latest quoted market prices.

4. Preferred stocks are stated primarily at cost adjusted for amortization of premiums and accrual of discounts and for other than temporary decline in the fair value of the preferred stock. An exception is preferred stocks with an NAIC designation of RP4 to RP6 and P4 to P6, which are reported at the lower of amortized cost or fair value.

NOTES TO FINANCIAL STATEMENTS

5. Investments in mortgage loans on real estate are reported at cost adjusted for amortization of premiums and accrual of discounts. Amortization is computed using methods which result in a level yield over the life of the loan. Mortgage loans are stated at the aggregate unpaid principal balance net of loan loss allowance.

6. If the fair value of a loan-backed or structured security is less than its amortized cost at the reporting date, the Company assesses whether the impairment is other than temporary. If the Company intends to sell the loan-backed or structured security, an other than temporary impairment is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.

If the Company does not intend to sell the loan-backed or structured security, the Company assesses whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost, an other than temporary impairment is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.

If the Company does not expect to recover the amortized cost basis of the security, it is unable to assert that it will recover its amortized cost even if it does not intend to sell the security and the entity has the intent and ability hold such security. Therefore, in those situations, an other than temporary impairment is considered to have occurred and a loss is recognized in an amount equal to the excess of amortized cost over the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate.

Interest income is recognized on an accrual basis. Dividend income is recognized when declared. The Company does not accrue income on bonds in default which are delinquent more than twelve months. Further, income is not accrued when collection is uncertain.

7. The Company accounts for investments in subsidiaries, controlled and affiliated ("SCA") entities using the audited statutory equity of the investee if the entity is an insurance company. All non-insurance entities are valued at the audited equity of the investee using accounting principles generally accepted in the United States of America ("U.S. GAAP").

The Company classifies certain investments in SCA entities as residual interests. During the year, the Company early adopted the guidance for residual interests under SSAP No. 21 – Other Admitted Assets and elected to account for residual interests using the practical expedient method.

8. The Company has ownership interests in joint ventures, partnerships, and limited liability companies. The Company carries these interests based on the underlying audited U.S. GAAP equity of the investee.

The Company classifies certain investments in joint ventures, partnerships and limited liability companies as residual interests. The Company accounts for residual interests using the practical expedient method.

9. The Company has fixed index annuity products that guarantee the return of principal to the policyholder and credit interest based on a percentage of the gain in a specified market index. When fixed index annuity premiums are received, a portion of the premium is used to purchase derivatives consisting of call options on the applicable market indices to fund the index credits due to fixed index annuity policyholders. All such call options are purchased to match the funding requirements of the underlying policies. On the respective anniversary dates of the fixed index policies, the index used to compute the annual index credit is reset and the Company purchases new call options to fund the next annual index credit. The Company manages the cost of these purchases through the terms of its fixed index annuities, which permit the Company to change annual participation rates, caps and/or asset fees, subject to guaranteed minimums. By adjusting participation rates, caps or asset fees, the Company can generally manage options costs except in cases where the contractual features would prevent further modifications.

The Company's hedging strategy attempts to mitigate any potential risk of loss under these agreements through a regular monitoring process which evaluates the program's effectiveness. The Company purchases call options to fund the next annual index credit on fixed index annuities from nationally recognized investment banking institutions. The Company is exposed to risk of loss in the event of nonperformance by the counterparties and, accordingly, it purchases its option contracts from multiple counterparties and evaluates the creditworthiness of all counterparties prior to purchase of the contracts. All of these options purchased by the Company have been purchased from nationally recognized financial institutions with a Standard and Poor's credit rating of A - or higher at the time of purchase. The Company also has credit support agreements that allow it to request the counterparty to provide collateral to it when the fair value of the exposure to the counterparty exceeds specified amounts (See Note 16 for more information).

The Company follows IAC 191-97, a prescribed practice issued by the Insurance Division. Under this prescribed practice, call option derivative instruments that hedge the growth in interest credited on fixed index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income.

The Company has foreign exchange forwards that are used to hedge the currency risk associated with investments denominated in foreign currencies.

10. The Company does not anticipate investment income as a factor in the premium deficiency calculation.

11. The Company utilizes actuarial tables and incurred but not reported data to estimate the liabilities for losses and loss/claim adjustment expense for accident and health contracts.

12. No material changes were made to the capitalization policy during 2024.

13. The Company did not have any pharmaceutical rebate receivables as of December 31, 2024.

NOTES TO FINANCIAL STATEMENTS

(5) The process for evaluating loan-backed securities is based on a number of factors. The primary consideration in the evaluation process is the issuer's ability to meet current and future interest and principal payments as contractually stated at the time of purchase. The review of these securities includes an analysis of the cash flow modeling under various default scenarios considering independent third-party benchmarks, the seniority of the specific tranche within the structure of the security, the composition of the collateral and the actual default, loss severity, and prepayment experience exhibited. With the input of third-party assumptions for default projections, loss severity and prepayment expectations, the Company evaluates the cash flow projections to determine whether the security is performing in accordance with its contractual obligations.

At December 31, 2024, the Company had no exposure to subprime loan-backed securities. Substantially all of the owned securities are in the highest rated tranche of the pool in which they are structured and are not subordinated to any other tranche.

NOTE 8 Derivative Instruments

- A. Derivatives under SSAP No. 86—Derivatives

The Company uses call options to pay the benefit provided for in the Company's indexed annuity insurance products. The financial characteristics of the call options purchased by the Company generally provide for the Company to be paid the one-year appreciation of various published indices. The term of the call options is generally one year. The Company pays cash to the counterparty based upon an agreed to price at the outset of the contract. The counterparty usually pays a single payment at each due date.

The Company is exposed to risk of loss in the event of nonperformance by the counterparties and, accordingly, the Company purchases its option contracts from multiple counterparties and evaluates the creditworthiness of all counterparties prior to purchase of the contracts. All options had been purchased from nationally recognized investment banking institutions (See Note 16 of our annual statement for more information). In accordance with IAC 191-97, call option derivative instruments that hedge the growth in interest credited on index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income.

For the years ended December 31, 2024, and 2023, proceeds received upon expiration of options and amortization of options included as components of net investment income were as follows:

	12/31/2024	12/31/2023

In some states, these assessments can be partially recovered through a reduction in future premium taxes. The Company paid assessments of \$18,355,520 and \$10,805 during the years ended December 31, 2024, and 2023, respectively.

In accordance with applicable accounting guidelines, the Company will establish an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter is developing, the Company, in conjunction with outside counsel, evaluates on an ongoing basis whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure, and if not the matter will continue to be monitored for further developments. If and when the loss contingency related to litigation or regulatory matters is deemed to be both probable and estimable, the Company will establish an accrued liability with respect to that matter and will continue to monitor the matter for further developments that may affect the amount of the accrued liability.

The Company did not have any accrued liabilities at December 31, 2024, related to a product regulatory matter with a state insurance department.

There can be no assurance that any pending or future litigation will not have a material adverse effect on its business, financial condition, or results of operations.

NOTES TO FINANCIAL STATEMENTS

(3) Policy on Transfers Into and Out of Level 3

Transfers of securities among the levels occur at times and depend on the type of inputs used to determine fair value of each security.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Fair value is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The objective of a fair value measurement is to determine that price for each financial instrument at each measurement date. The Company met this objective using various methods of valuation that include market, income and cost approaches.

The Company categorizes its financial instruments into three levels of fair value hierarchy based on the priority of inputs used in determining fair value. The hierarchy defines the highest priority inputs (Level 1) as quoted prices in active markets for identical assets or liabilities. The lowest priority inputs (Level 3) are the Company's assumptions about what a market participant would use in determining fair value such as estimated future cash flows. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. The Company categorizes its financial assets and liabilities recorded at fair value in the consolidated balance sheets as follows:

Level 1 - Quoted prices are available in active markets for identical financial instruments as of the reporting date. The Company does not adjust the quoted price for these financial instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

Level 2 - Quoted prices in active markets for similar financial instruments, quoted prices for identical or similar financial instruments in markets that are not active; and models and other valuation methodologies using inputs other than quoted prices that are observable.

Level 3 - Models and other valuation methodologies using significant inputs that are unobservable for financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. Financial instruments that are included in Level 3 are securities for which no market activity or data exists and for which the Company used discounted expected future cash flows with its own assumptions about what a market participant would use in determining fair value.

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The following table represents the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries and joint ventures). The fair values are also categorized into the three level fair value hierarchy.

The following methods and assumptions were used by the Company in estimating the fair values of financial instruments.

Bonds: The fair values of bonds are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.

Preferred and common stock: The fair values of preferred and unaffiliated common stocks are based on quoted market prices.

Mortgage loans on real estate: The fair values of mortgage loans on real estate are calculated using discounted expected cash flows using current competitive market interest rates currently being offered for similar loans.

When quoted market prices are not available, the fair values are determined by calculating the present value of future cash flows discounted by a risk free rate.

Policy loans: The Company has not attempted to determine the fair values associated with its policy loans as management believes any differences between the Company's carrying value and the fair values afforded these instruments are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure is not worth the benefit to be derived.

Cash, cash equivalents and short-term investments: Amounts reported in the statutory-basis balance sheets for these instruments are reported at their historical cost which approximates fair value due to the nature of the assets assigned to this category.

NOTES TO FINANCIAL STATEMENTS

D. Not Practicable to Estimate Fair Value

The Company has not attempted to determine the fair values associated with policy loans, as the Company believes any differences between carrying values and fair values are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure does not justify the benefit to be derived. As a result, the Company also has not determined an effective interest rate or maturity date.

Effective October 1, 2021, the Company entered into a coinsurance funds withheld treaty with AEL Re Vermont, a newly formed Vermont-domiciled reinsurance affiliate, under which the Company is ceding 100% of the risk associated with the Lifetime Income Benefit Rider ("LIBR") payments greater than the fund value of the underlying contract for certain of its FIA policies. All of the policies subject to the treaty require the policyholder to pay a fee for the option to exercise the LIBR benefit.

The difference between the statutory-basis reserves ceded and the initial Funds Withheld Account ("FWA") will be financed through an excess of loss XOL treaty between the AEL Re Vermont and Hannover Life Reassurance Company of America ("HLRA") whereby HLRA will pay 100% of LIBR claims after exhaustion of the contract values and the FWA. Effective October 1, 2021, the XOL coverage will be 25 years from the inception year of each yearly cohort (with extension to 30 years assuming the funds withheld account is continuously at least 80% of the target amount after 2031). AEL Re Vermont has obtained permission from the Vermont

The coinsurance funds withheld treaty is summarized as follows:

Income Statement	12/31/2024	12/31/2023
Annuity Considerations	\$ 145,933,205	\$ 162,251,168

Effective October 1, 2023, the Company entered into a coinsurance funds withheld treaty with AEL Re Vermont II, Inc under which the Company is assuming 100% of the risk associated with both an in-force block and a flow block. Flow business will be reinsured through December 31, 2025, subject to a limit. The Company will assume the Lifetime Income Benefit Rider ("LIBR") claim payments greater than the income account value ("IAV") for underlying contracts of certain of its FIA policies. All of the policies subject to the treaty require the policyholder to pay a fee for the option to exercise the LIBR benefit.

The difference between the statutory-basis reserves assumed and the initial Funds Withheld Account ("FWA") will be financed through an excess of loss ("XOL") treaty between the Company and Canada Life Reinsurance ("CLRe") whereby CLRe will pay 100% of LIBR claims after exhaustion of the IAV and the FWA. Effective October 1, 2023, the XOL coverage will be 20th anniversary of the effective date (October 1, 2043) with extension of up to the 25th anniversary of the effective date (October 1, 2048), subject to the XOL limit defined in the treaty. The Company has obtained a permitted practice from the Vermont Department of Financial Regulation to treat the XOL agreement as an admitted asset. Effective December 1, 2024, both parties mutually agreed to suspend the ongoing flow

The Company considered the guidance in NAIC Statement of Statutory Accounting Principles 61R, Life and Health Reinsurance ("SSAP 61R"), Appendix A-791 Life and Health Reinsurance Agreements ("Appendix A-791") and Issue Paper 74 in evaluating whether a transfer of risk has occurred with respect to the XOL treaty. The XOL treaty is considered a stop loss or non-proportional reinsurance agreement. SSAP 61R requires the contract terms to be evaluated to assess whether significant risk is transferred to the reinsurer. Based upon the Company's analysis of the contract and expectations of future claim payments, the Company does not expect CLRe to pay claims as a result of the agreement. The nature of this XOL agreement does not meet risk transfer criterion; therefore, the Company will apply deposit accounting.

The coinsurance funds withheld treaty is summarized as follows:

Effective December 1, 2024, American Equity Life entered into a reinsurance agreement with AEL Re Vermont III Inc. ("AEL Re Vermont III"), an affiliated captive reinsurance company wholly owned by the Holding Company and affiliate of American Equity Life, to cede both an in-force and ongoing flow of LIBR payments in excess of the IAV for underlying contracts of certain FIA policies on a funds withheld basis (the "VT III treaty"). All the policies subject to the VT III treaty require the policyholder to pay a fee for the option to exercise the LIBR benefit.

In connection with the VT III treaty, AEL Re Vermont III entered into an XOL reinsurance agreement (the "VT III XOL treaty") with CLRe to retrocede the LIBR payments in excess of IAV ceded under the VT III treaty after the funds withheld account balance is exhausted, subject to an XOL limit defined in the VT III XOL treaty. Effective December 1, 2024, the XOL coverage will be the 20th anniversary of the effective date (December 1, 2044) with extension up to the 25th anniversary of the effective date (December 1, 2049). AEL Re Vermont has obtained a permitted practice from the Vermont Department of Financial Regulation to treat the VT III treaty as an admitted asset.

Effective December 1, 2024, both parties mutually agreed to recapture 100% of the liabilities and obligations associated to this coinsurance agreement ("the AEL Re Bermuda recapture"). Effective July 1, 2021, American Equity Investment Life Insurance Company ("American Equity Life") entered into a reinsurance agreement with North End Re (Cayman) SPC ("North End Re") (the "North End Re reinsurance treaty"), a wholly owned subsidiary of Brookfield Wealth Solutions ("BWS" or "Brookfield") and an affiliate of the American Equity Life reinsure 70% on a modified coinsurance ("modco") and 30% on a coinsurance basis certain in-force and ongoing flow fixed indexed annuity product liabilities. The liabilities reinsured on a coinsurance basis are secured by assets held in a statutory and supplemental trust (collectively referred to as the "Trusts") with American Equity Life as the sole beneficiary. The liabilities reinsured on a modco basis are secured by assets held by American Equity Life in a segregated modco account. The North End Re reinsurance treaty was subsequently amended in 2022 to include additional in-force and flow fixed indexed annuity products and in 2023 to stop the reinsurance of flow products effective as of October 1, 2023.

As part of the North End Re reinsurance treaty, American Equity Life receives an annual ceding commission that ranges from 49 to 140 basis points and an annual asset liability management ("ALM") fee equal to 30 basis points calculated based on the initial cash surrender value of liabilities ceded. Such fees are fixed and contractually guaranteed for six to seven years. Additionally, American Equity Life receives certain acquisition cost reimbursements and an on-going annual expense reimbursement.

As a result of the North End Re reinsurance treaty, there is a deferred gain which represents the unamortized portion of the cost of reinsurance related to the in-force business which will be amortized over the life of the underlying reinsured policies. American Equity Life remains liable to policyholders with respect to the policy liabilities ceded to North End Re should North End Re fail to meet the obligations it has reinsured. The assets in the Trusts and modco account are required to remain at a value that is sufficient to support the current balance of policy benefit liabilities of the ceded business on a statutory basis. The assets in the trusts and modco account are subject to investment management agreements between American Equity Life and North End Re.

Effective December 1, 2024, both parties mutually entered a Recapture Agreement whereby 100% of the liabilities and obligations were recaptured (the "North End Re recapture"). All balances currently recorded by American Equity Life will be written off the Balance Sheet at their carrying amount as of December 1, 2024. The assets held in the statutory trust will be transferred to American Equity Life and recognized at fair value in the Balance Sheet as of December 1, 2024. As shown in the table below, the net impact of the North End Re recapture is a loss immediately recognized in the accounts where they were initially recorded.

The North End Re treaty, inclusive of the North End Re recapture loss, is summarized as follows:

Under the agreement, American Equity Life ceded 100% of certain in-force fixed index and fixed rate annuity product liabilities - 75% on a funds withheld coinsurance basis and 25% on a coinsurance basis. Effective February 8, 2023, AeBe and American Equity Life commenced reinsuring flow business of certain single premium fixed deferred annuities, subject to an annual limit. The liabilities reinsured on a coinsurance basis are secured by assets held in both a statutory and supplemental trust (collectively referred to as the “trusts”). The liabilities reinsured on a funds withheld basis are secured by a segregated funds withheld account in which the assets are maintained by American Equity Life. At the close of the reinsurance agreement, American Equity Life received a closing ceding commission of \$70 million. For flow business ceded, American Equity Life will receive an annual ceding commission over the term of the policy of up to 0.35% of the premium received.

In addition, American Equity Life will receive certain acquisition cost reimbursements and an on-going annual expense reimbursement on each policy subject to the reinsurance agreement for the entirety of the policy duration. As a result of the AeBe reinsurance treaty, there is a deferred gain which represents the unamortized portion of the cost of reinsurance related to the in-force business which will be amortized over the life of the underlying reinsured policies. American Equity Life remains liable to policyholders with respect to the policy liabilities ceded to AeBe should AeBe fail to meet the obligations it has reinsured. The assets in the trusts and funds withheld account are required to remain at a value that is sufficient to support the current balance of policy benefit liabilities of the ceded business on a statutory basis. The assets in the trusts and funds withheld account are subject to investment management agreements between American Equity Life and 26North.

Unpaid claims include amounts for losses and related adjustment expenses and are determined using individual claim evaluations and statistical analysis. Unpaid claims represent estimates of the ultimate net costs of all losses, reported and unreported, which remain unpaid at the end of the current reporting period. These estimates are necessarily subject to the impact of future changes in claim severity, frequency and other factors. In spite of the variability inherent in such situations, management believes that the unpaid claim amounts are adequate. The estimates are continuously reviewed and as adjustments to these amounts become necessary, such adjustments are reflected in current operations.

The Company adopted IAC 191-97 and under this prescribed practice indexed annuity reserves are calculated based on Standard Valuation Law and Guideline 35 assuming the market value of the call options associated with the current index term is zero regardless of the observable market value for such options. At the conclusion of the index term, credited interest is reflected in the reserve as realized, based on actual index performance.

- (3) As of December 31, 2024, the Company has no insurance in force for which the gross premiums are less than the net premiums according to the standard valuation set by the State of Iowa.
- (4) The Tabular Interest, Tabular Less Actual Reserves Released and Tabular Cost have been determined by formula as described in the instructions.
- (5) For the determination of Tabular Interest on fund not involving life contingencies for each valuation rate of interest, the tabular interest is calculated as one hundredth of the product of such valuation rate of interest times the mean of the amount of funds subject to such valuation rate of interest held at the beginning and end of the year of valuation.
- (6) None.
