NOTES TO FINANCIAL STATEMENTS

NOTE 1 Summary of Significant Accounting Policies and Going Concern

A. Accounting Practices

The financial statements of the Company are presented on the basis of accounting practices prescribed or permitted by the Iowa Department of Commerce, Insurance Division (the "Insurance Division").

The Insurance Division recognizes only statutory accounting practices prescribed or permitted by the State of Iowa for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under Iowa Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the Insurance Division. The Company differs from NAIC SAP under Iowa Administrative Code 191 - Chapter 97, Accounting for Certain Derivative Instruments Used to Hedge the Growth in Interest Credited for Indexed Insurance Products and Accounting for the Indexed Insurance Products Reserve ("IAC 191-97"), a prescribed practice issued by the Insurance Division. Under this prescribed practice, call option derivative instruments that hedge the growth in interest credited on index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income and indexed annuity reserves are calculated based on Standard Valuation Law and Guideline 35 assuming the market value of the call options associated with the current index term is zero regardless of the observable market value for such options.

The Company also has a prescribed practice under Iowa Administrative Code 191 - Chapter 43 "Annuity Mortality Tables For Use In Determining Reserve Liabilities for Annuities" ("IAC 191-43") which allows the use of the Annuity 2000 Mortality Table for determining the minimum standard of valuation for annuities issued during 2015. The Company began using the 2012 IAR Mortality Table for annuities issued on or after January 1, 2016. NAIC SAP requires the use of the 2012 IAR Mortality Table for determining the minimum standard of valuation for annuities issued on or after January 1, 2015.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the Insurance Division is shown below:

B. Use of Estimates in the Preparation of the Financial Statements

No significant changes have occurred in disclosure from December 31, 2023.

C. Accounting Policy

1. No significant changes have occurred in disclosure from December 31, 2023.

2. Investments in bonds rated NAIC 1-5 (including loan-backed securities), are reported at cost adjusted for amortization of premiums or discounts. Bonds with NAIC 6 ratings are reported at the lower of amortized cost or fair value. Amortization is computed using methods which result in a level yield over the life of the security. The Company reviews its prepayment assumptions on mortgage and other asset-backed securities at regular intervals and adjusts amortization rates retrospectively when such assumptions are changed due to experience and/or expected future patterns.

Realized capital gains and losses are recorded on the trade date and determined on the basis of specific identification and are recorded net of related federal income taxes and amounts transferred to the Interest Maintenance Reserve ("IMR"). Under a formula prescribed by the NAIC, the Company defers, in the IMR, the portion of realized gains and losses on sales of fixed income investments, principally bonds, attributable to changes in the general level of interest rates and amortizes those deferrals over the remaining period to maturity of the security. Pursuant to NAIC guidance INT 23-01, net negative (disallowed) IMR may be reported as an admitted asset by the reporting entity, subject to a limitation of 10% of the reporting entity's adjusted general account capital and surplus. The Asset Valuation Reserve ("AVR") is established by the Company to provide for anticipated losses in the event of default by issuers of certain invested assets. The AVR is determined using a formula that is intended to establish a reserve to offset potential credit-related investment losses.

The carrying values of all investments are reviewed on an ongoing basis for credit deterioration. An other than temporary impairment shall be considered to have occurred if it is probable that the reporting entity will be unable to collect all amounts due according to the contractual terms of a debt security in effect at the date of acquisition. If this review indicates a decline in fair value that is other than temporary, the carrying amount of the investment, other than loan-backed and structured securities, is reduced to its fair value and a specific other than temporary impairment is taken. A decline in fair value which is other than temporary includes situations where the Company has made a decision to sell a security prior to its maturity at an amount below its carrying value. Such reductions in carrying values are recognized as realized losses on investments.

3. No significant changes have occurred in disclosure from December 31, 2023.

4. No significant changes have occurred in disclosure from December 31, 2023.

5. No significant changes have occurred in disclosure from December 31, 2023.

NOTES TO FINANCIAL STATEMENTS

6. If the fair value of a loan-backed or structured security is less than its amortized cost at the reporting date, the Company assesses whether the impairment is other than temporary. If the Company intends to sell the loan-backed or structured security, an other than temporary impairment is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.

If the Company does not intend to sell the loan-backed or structured security, the Company assesses whether it has the intent and ability to retain the investment in the security for a period of time sufficient to recover the amortized cost. If the Company does not have the intent and ability to retain the investment for the time sufficient to recover the amortized cost, an other than temporary impairment is considered to have occurred and a loss is recognized through earnings in an amount equal to the excess of amortized cost over fair value at the reporting date.

If the Company does not expect to recover the amortized cost basis of the security, it is unable to assert that it will recover its amortized cost even if it does not intend to sell the security and the entity has the intent and ability hold such security. Therefore, in those situations, an other than temporary impairment is considered to have occurred and a loss is recognized in an amount equal to the excess of amortized cost over the present value of cash flows expected to be collected, discounted at the loan-backed or structured security's effective interest rate.

Interest income is recognized on an accrual basis. Dividend income is recognized when declared. The Company does not accrue income on bonds in default which are delinquent more than twelve months. Further, income is not accrued when collection is uncertain.

7. No significant changes have occurred in disclosure from December 31, 2023.

8. No significant changes have occurred in disclosure from December 31, 2023.

9. No significant changes have occurred in disclosure from December 31, 2023.

NOTE 5 Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

The Company has seventeen residential mortgage loans that were derecognized as a result of foreclosure. The aggregate amount of residential mortgage loans derecognized was \$9,740,290 and the real estate collateral recognized was \$9,740,290. No other collateral was recognized.

B. Debt Restructuring

No significant changes have occurred in disclosure from December 31, 2023.

C. Reverse Mortgages

No significant changes have occurred in disclosure from December 31, 2023.

D. Loan-Backed Securities

- (1) Prepayment assumptions for loan-backed securities were obtained from third party rating agencies and/or third party loan servicers.
- (2) For the three months ended March 31, 2024, the Company did not recognize other than temporary impairments ("OTTI") on its loan-backed securities on the basis of intent to sell and on the basis of the inability or lack of intent to retain the investment in the security for a period of time sufficient to recover the amortized cost basis.
- (3) The following table lists the loan-backed securities held by the Company at March 31, 2024 for which the present value of cash flows expected to be collected was less than amortized cost, and, as a result, OTTI was recorded during the three months ended March 31, 2024:

Total OTTI recognized under SSAP 43R the three months ended March 31, 2024: \$347,300.

NOTES TO FINANCIAL STATEMENTS

For loan-backed and structured securities with unrealized losses as of March 31, 2024, the gross unrealized losses and fair value, aggregated by length of (4) time that individual securities have been in a continuous unrealized loss position, are summarized as follows:

a) The aggregate amount of unrealized losses:		
1. Less than 12 Months	\$	30,482,777
2. 12 Months or Longer	\$	701,751,109
b)The aggregate related fair value of securities with unrealized losses:		
1. Less than 12 Months	\$	1,460,901,572
2. 12 Months or Longer	\$	5,767,325,679

(5) The process for evaluating loan-backed securities is based on a number of factors. The primary consideration in the evaluation process is the issuer's ability to meet current and future interest and principal payments as contractually stated at the time of purchase. The review of these securities includes an analysis of the cash flow modeling under various default scenarios considering independent third party benchmarks, the seniority of the specific tranche within the structure of the security, the composition of the collateral and the actual default, loss severity, and prepayment experience exhibited. With the input of third party assumptions for default projections, loss severity and prepayment expectations, the Company evaluates the cash flow projections to determine whether the security is performing in accordance with its contractual obligations.

At March 31, 2024, the Company had no exposure to subprime loan-backed securities. Substantially all of the owned securities are in the highest rated tranche of the pool in which they are structured and are not subordinated to any other tranche.

E. Dollar Repurchase Agreements and/or Securities Lending Transactions

- (1) As of December 31, 2023 there were no securities lending programs.
- (2) There were no assets pledged as collateral as part of a dollar repurchase agreement or securities lending transaction as of December 31, 2023.

NOTE 8 Derivative Instruments

A. Derivatives under SSAP No. 86—Derivatives

The Company uses call options to pay the benefit provided for in the Company's indexed annuity insurance products. The financial characteristics of the call options purchased by the Company generally provide for the Company to be paid the one-year appreciation of various published indices. The term of the call options is generally one year. The Company pays cash to the counterparty based upon an agreed to price at the outset of the contract. The counterparty usually pays a single payment at each due date.

The Company is exposed to risk of loss in the event of nonperformance by the counterparties and, accordingly, the Company purchases its option contracts from multiple counterparties and evaluates the creditworthiness of all counterparties prior to purchase of the contracts. All options had been purchased from nationally recognized investment banking institutions (See Note 16 of our annual statement for more information). In accordance with IAC 191-97, call option derivative instruments that hedge the growth in interest credited on index products are accounted for at amortized cost with the corresponding amortization recorded as a decrease to net investment income.

For the three months ended March 31, 2024, proceeds received upon expiration of options and amortization of options included as components of net investment income were as follows:

	03/31/2024
Proceeds received upon expiration	\$ 266,367,357

NOTE 14 Liabilities, Contingencies and Assessments

A-E. No significant changes have occurred in disclosure from December 31, 2023.

F. All Other Contingencies

The Company is occasionally involved in litigation, both as a defendant and as a plaintiff. In addition, state regulatory bodies, such as state insurance departments, the Securities and Exchange Commission, the Department of Labor, and other regulatory bodies regularly make inquiries and conduct examinations or investigations concerning its compliance with, among other things, insurance laws, securities laws and the Employee Retirement Income Security Act of 1974, as amended.

In accordance with applicable accounting guidelines, the Company will establish an accrued liability for litigation and regulatory matters when those matters present loss contingencies that are both probable and estimable. As a litigation or regulatory matter is developing, the Company, in conjunction with outside counsel, evaluates on an ongoing basis whether the matter presents a loss contingency that meets conditions indicating the need for accrual and/or disclosure, and if not the matter will continue to be monitored for further developments. If and when the loss contingency related to litigation or regulatory matters is deemed to be both probable and estimable, the Company will establish an accrued liability with respect to that matter and will continue to monitor the matter for further developments that may affect the amount of the accrued liability.

The Company did not have any accrued liabilities at March 31, 2024.

There can be no assurance that any pending or future litigation will not have a material adverse effect on its business, financial condition, or results of operations.

(3) Policy on Transfers Into and Out of Level 3

Transfers of securities among the levels occur at times and depend on the type of inputs used to determine fair value of each security.

(4) Inputs and Techniques Used for Level 2 and Level 3 Fair Values

Fair value is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. The objective of a fair value measurement is to determine that price for each financial instrument at each measurement date. The Company met this objective using various methods of valuation that include market, income, and cost approaches.

The Company categorizes its financial instruments into twelve levels of fair value hierarchy based on the priority of inputs used in determining fair value. The hierarchy defines the highest priority inputs (Level 1) as quoted prices in active markets for identical assets or liabilities. The lowest priority inputs (Level 3) are the Company's assumptions about what a market participant would use in determining fair value such as estimated future cash flows. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, a financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Company's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the financial instrument. The Company categorizes its financial assets and liabilities recorded at fair value in the consolidated balance sheet as follows:

Level 1 - Quoted prices are available in active markets for identical financial instruments as of the reporting date. The Company does not adjust the quoted price for these financial instruments, even in situations where it holds a large position and a sale could reasonably impact the quoted price.

Level 2 - Quoted prices in active markets for similar financial instruments, quoted prices for identical or similar financial instruments in markets that are not active, and models and other valuation methodologies using inputs other than quoted prices that are observable.

Level 3 - Models and other valuation methodologies using significant inputs that are unobservable for financial instruments and include situations where there is little, if any, market activity for the financial instrument. The inputs into the determination of fair value require significant management judgment or estimation. Financial instruments that are included in Level 3 are securities for which no market activity or data exists and for which the Company used discounted expected future cash flows with its own assumptions about what a market participant would use in determining fair value.

(5) Derivative Fair Values

None.

B. Other Fair Value Disclosures

None.

NOTES TO FINANCIAL STATEMENTS

C. Aggregate fair value for all financial instruments and the level within the fair value hierarchy in which the fair value measurements in their entirety fall.

The following table represents the fair values and admitted values of all admitted assets and liabilities that are financial instruments excluding those accounted for under the equity method (subsidiaries and joint ventures). The fair values are also categorized into the three level fair value hierarchy.

The following methods and assumptions were used by the Company in estimating the fair values of financial instruments.

Bonds: The fair values of fixed maturity securities in an active and orderly market are determined by utilizing independent pricing services. The independent pricing services incorporate a variety of observable market data in their valuation techniques, including:

- reported trading prices
- benchmark yields
- broker-dealer quotes
- benchmark securities
- bids and offers
- credit ratings
- relative credit information, and
- other reference data

The independent pricing services also take into account perceived market movements and sector news, as well as a security's terms and conditions, including any features specific to that issue that may influence risk and marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary.

The independent pricing services provide quoted market prices when available. Quoted prices are not always available due to market inactivity. When quoted market prices are not available, the third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded. The Company generally obtains one value from our primary external pricing service. In situations where a price is not available from this service, the Company may obtain quotes or prices from additional parties as needed. Market indices of similar rated asset class spreads are considered for valuations and broker indications of similar securities are compared. Inputs used by the broker include market information, such as yield data and other factors relating to instruments or securities with similar characteristics. Valuations and quotes obtained from third party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The Company validates external valuations at least quarterly through a combination of procedures that include the evaluation of methodologies used by the pricing services, comparison of the prices to a secondary pricing source, analytical reviews and performance analysis of the prices against trends, and maintenance of a securities watch list. Additionally, as needed, the Company utilizes discounted cash flow models or performs independent valuations on a case-by-case basis using inputs and assumptions similar to those used by pricing services. Although the Company does identify differences from time to time as a result of these validation procedures, no significant adjustments were made as of March 31, 2024, and December 31, 2023.

Preferred and common stock: The fair values of preferred and unaffiliated common stocks are based on quoted market prices and discounted expected future cash flows.

Mortgage loans on real estate: The fair values of mortgage loans on real estate are calculated using discounted expected cash flows using current competitive market interest rates currently being offered for similar loans. The fair values of impaired mortgage loans on real estate that the Company has considered to be collateral dependent are based on the fair value of the real estate collateral (based on appraised values) less estimated costs to sell. The inputs utilized to determine fair value of all mortgage loans are unobservable market data (competitive market interest rates); therefore, fair value of mortgage loans falls into Level 3 in the fair value hierarchy.

Real estate: The fair values of real estate investments are based on either market quotes or third party appraisals. An appraisal is used to estimate the fair value based on relevant data in the market. An appraisal is expected to be obtained at least once every five years and sooner if changes in market conditions indicate there has been a significant decrease in the fair value of the property.

Other invested assets: The fair values of other invested assets are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.

Derivatives: The fair values of call options are based upon the amount of cash that the Company will receive to settle each derivative instrument on the reporting date. These amounts are determined by our investment team using industry accepted valuation models. Inputs include market volatility and risk free interest rates and are used in income valuation techniques in arriving at a fair value for each option contract. The Company has no performance obligations related to the call options purchased to fund our fixed index annuity policy liabilities.

Policy loans: The Company has not attempted to determine the fair values associated with its policy loans as management believes any differences between the Company's carrying value and the fair values afforded these instruments are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure is not worth the benefit to be derived.

Other invested assets: The fair values of other invested assets are obtained from third parties and are based on quoted market prices when available. The third parties use yield data and other factors relating to instruments or securities with similar characteristics to determine fair value for securities that are not actively traded.

Cash, cash equivalents and short-term investments: Amounts reported in the statutory-basis balance sheets for these instruments are reported at their historical cost which approximates fair value due to the nature of the assets assigned to this category.

Policy benefit reserves: The fair values of the liabilities under contracts are stated at the cost the Company would incur to extinguish the liability (i.e., the cash surrender value). For period-certain annuity benefit contracts, the fair value is determined by discounting the benefits at the interest rates currently in effect for newly issued immediate annuity contracts.

NOTES TO FINANCIAL STATEMENTS

D. Not Practicable to Estimate Fair Value

The Company has not attempted to determine the fair values associated with policy loans, as the Company believes any differences between carrying values and fair values are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure does not justify the benefit to be derived. As a result, the Company also has not determined an effective interest rate or maturity date.

Type or Class of Financial Instrument	Carrying Value	Effective Interest Rate	Maturity Date	Explanation
Policy loans	\$ 710,864			The Company has not attempted to determine the fair values associated with policy loans as the Company believes any differences between carrying values and fair values are immaterial to the Company's financial position and, accordingly, the cost to provide such disclosure does not justify the benefit to be derived. As a result, the Company also has not determined an effective interest rate or maturity date.

E. Estimates using NAV practical expedient

None.

NOTE 21 Other Items

No significant changes have occurred in disclosure from December 31, 2023.

NOTE 22 Events Subsequent

Type I – Recognized Subsequent Events:

Subsequent events have been considered through May 9, 2024.

Type II – Nonrecognized Subsequent Events:

Subsequent events have been considered through May 9, 2024.

The Company is not subject to an annual fee under Section 9010 of the Federal Affordable Care Act.

Agreement and Plan of Merger

On May 2, 2024, the Holding Company completed the transactions contemplated by the Agreement and Plan of Merger, dated as of July 4, 2023 (the "Merger Agreement"), by and among the Holding Company, Brookfield Reinsurance Ltd., a Bermuda exempted company limited by shares ("Parent" or "Brookfield Reinsurance"), Arches Merger Sub Inc., an Iowa corporation and an indirect, wholly owned subsidiary of Parent ("Merger Sub") and, solely for the purposes set forth in the Merger Agreement, Brookfield Asset Management Ltd., a company incorporated under the laws of the Province of British Columbia ("BAM"). Pursuant to the Merger Agreement, the Company merged with and into Merger Sub, with the Company surviving as a wholly owned subsidiary of Parent (the "Brookfield Merger"). At the effective time of the Brookfield Merger, each issued and outstanding share of common stock, par value \$1.00 per share, of the Holding Company was converted into the right to receive (i) \$38.85 per share in cash, without interest and (ii) the Stock Consideration equal to 0.45464 fully-paid and nonassessable shares of class A limited voting shares of BAM. Due to the recent closing of the acquisition, the complete valuation and initial purchase price accounting for the business combination is not available as of the date of release of these financial statements.

Post-Effective Merger and Redomestication

On May 7, 2024 (the "Post-Closing Effective Date"), the Holding Company completed its previously announced merger with American National Group, LLC, a Delaware limited liability company ("ANAT") and an indirect, wholly-owned subsidiary of Brookfield Reinsurance. Pursuant to the Agreement and Plan of Merger, dated as of May 7, 2024, by and among the Company and ANAT (the "Post-Effective Merger Agreement"), ANAT merged with and into the Company (the "Post-Effective Merger") in accordance with the Iowa Business Corporation Act (the "IBCA"), with the Company surviving the Merger as an indirect wholly-owned subsidiary of Brookfield Reinsurance (such entity, the "Iowa Surviving Company").

Pursuant to a Plan of Domestication, dated as of May 7, 2024 (the "Plan of Domestication"), the Iowa Surviving Company discontinued its existence as an Iowa Corporation as provided under IBCA, including Section 931 of the IBCA, and, pursuant to the General Corporation Law of the State of Delaware (the "DGCL"), including Section 388 of the DGCL, continued its existence under the DGCL as a corporation incorporated in the State of Delaware (the "Reincorporation", and such corporation, the "Delaware Surviving Company"). In connection with the Reincorporation, the Delaware Surviving Company changed its name from American Equity Investment Life Holding Company to American National Group Inc. and adopted a new certificate of incorporation (the "Certificate of Incorporation") and bylaws. The Certificate of Incorporation and bylaws of American National Group Inc. are effective as of the Post-Closing Effective Date.
